01.04.2021 TANGLEY Erection of 2 x new towers on the Andover-Amesbury Circuit Hatherden Farm (Land To The West Of Chalkcroft Lane), Hatherden Lane, Hatherden, Andover Hampshire SP11 0HT Dalcour Maclaren On Behalf Of Southern Electric Fay Eames 28.04.2021

Form B Application under section 37 of the Electricity Act 1989 for the installation of above ground electricity lines with a nominal voltage of 132 Kilovolts and erection of 2 new 132kV towers on the Andover-Amesbury Circuit to support an electricity connection at Hatherden Farm Solar Farm permitted under application reference 19/03043/FULLN

COMMENTS:

Mewsey Parish Council would like to make the following comments with regard to this application:

With the increase in size of the substation can confirmation be given that there will be no noise increase that has not been considered or if there is an increase what measures will be taken to mitigate any extra noise that would have an adverse effect on wildlife

Regarding the wall mounted and floodlights, is this an increase in extra lighting and if so, has consideration been considered for this with regard to the impact on wildlife.

We do not understand that if the maximum (50MW) output has been approved due to being within the limit for Planning permission by TVBC, why, if the proposed 25cm increase in panel height generates more electricity then the yield must be higher and this therefore is an increase in output. We believe this application will require further planning approval at a higher level. Can this be fully clarified.

It is understood that by leaving fencing height the same, this will mean that the panels will be more noticeable. Could consideration be given to more mature trees and shrubs within the Landscape plan to improve the visual impact at a shorter overall time.

The landscaping time scales have been moved out, therefore a reassurance is required that the landscape planting will be actioned as soon as it is possible to avoid delay. Otherwise, the timescale and build start should be aligned with the seasons to allow planting to take place in line with the autumn/winter planting year.

Private access track and substation compound in connection with Hatherden Farm Solar Farm

COMMENTS:

Penton Mewsey Parish Council would like to make the following comments with regard to this application:

This bridlepath is heavily used by horses and pedestrians at all times during the day and every single day. We would like some assurance that a speed restriction on the access track by ALL vehicle movements will be controlled by management onsite as a safety procedure for the planned access crossing of the bridlepath.

We would expect damage to existing hedgerows or at the very least minimum disruption to the existing planting be made to ensure the existing wooded area adjacent on both sides of the bridlepath is preserved.
