

Update from Upper Anton Parishes Flood Forum from Southern Water for Penton Mewsey

Good News!

Following a meeting of the Upper Anton Parishes Flood Forum on June 19th 2025, a CCTV survey of the pipework has now been completed for Penton Mewsey and work to reline the pipeline is scheduled to start this summer (2025) with financial funding confirmed. The work may not be finished by next winter.

Please be aware that there may be road closures while work is undertaken. The Parish Council has requested advance notice of dates when the work will commence and which roads may be closed for a period of time for the work to be carried out. These will be posted on our Parish Council website as soon as we receive the information.

Below is a plan for relining the pipelines for your information:
